Test run 2024/08/30

This test run verifies the complete registration and login workflow. It includes checking the process of creating a new account by filling in all required fields, submitting the registration form, and successfully logging in with the newly created credentials. The test will ensure that both registration and login functionalities work as expected, and that appropriate error messages are displayed for invalid inputs.

Create an account using valid data in mandatory fields, ensuring each field meets its minimum required criteria.

Comment

Defect report:

Title: An error message incorrectly indicated that the wrong password corresponds to an unregistered account, while simultaneously suggesting that an account with a 20 and 1 character username is successfully registered, despite the upper and lower limits being greater than 1 and less than 20 characters.

Steps to reproduce:

- 1. Launch the Chrome browser
- $2. \ \ Navigate \ to \ the \ page \ \underline{https://www.opencart.com/index.php?route=account/register}$
- 3. Enter invalid inputs {"fgdfgFjislavfdgfgicD", "(","@"} in the field Username
- 4. Enter Johngiflg in the field First Name
- 5. Enter Doejgfldjg in the field Last Name
- 6. Enter pisato4481@apifan.com in the field E-mail
- 7. Click on the Country drop-down menu and Select Serbia
- 8. Enter T1qd in the field Password
- 9. Solve the reCAPTCHA by clicking on the Pencil icon
- 10. Click the REGISTER button

Expected result: The error message should appear and be highlighted in red: Username must be greater than 1 and less than 20 characters!

Actual result: An error message incorrectly indicated that the wrong password corresponds to an unregistered account, while simultaneously suggesting that an account with a 20 and 1 character username is successfully registered, despite the upper and lower limits being greater than 1 and less than 20 characters.
